2) Project Title and Description

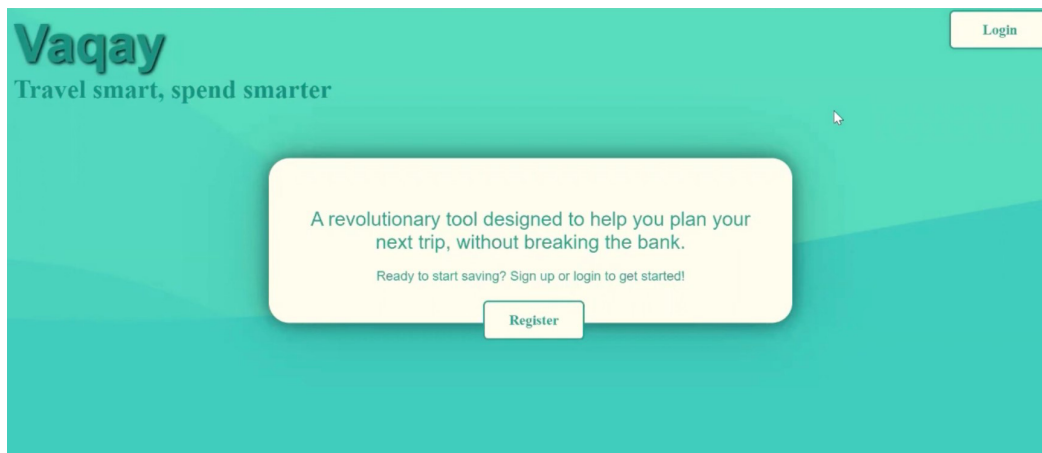

Title: Vaqay

Creating and adhering to a budget while traveling is essential for a successful trip; however, it can be a daunting task to plan, manage expenses, and divide costs amongst multiple people, especially when traveling in a large group. Our proposed web application aims to make this process easier by providing a collaborative, user-friendly platform for creating and managing a travel budget, tracking transactions, and analyzing spending.

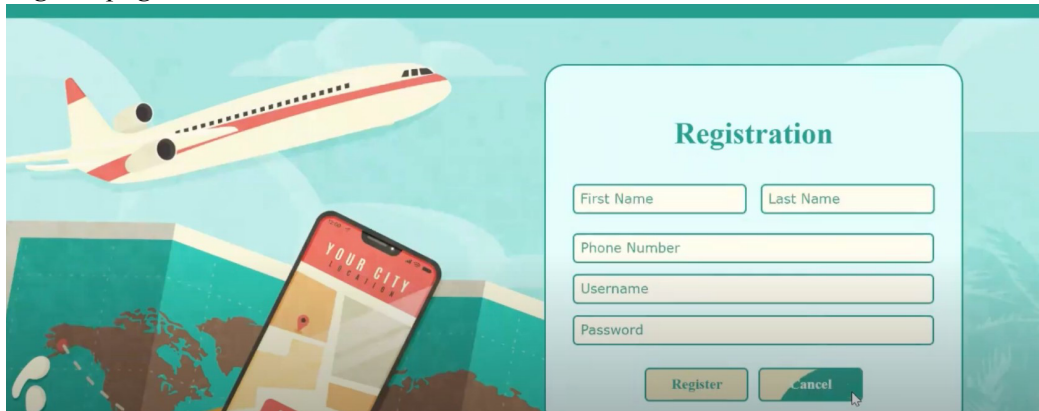

3) Accomplishments and overall project status during this increment

The full app interface is fully functional.

We've completed design and implementation of Landing page,

Register page,

The registration form is titled "Registration" and is set against a background illustration of a yellow airplane with red stripes flying over a map. A smartphone in the foreground displays "YOUR CITY LOCATION". The form includes input fields for "First Name", "Last Name", "Phone Number", "Username", and "Password". At the bottom are "Register" and "Cancel" buttons.

Registration

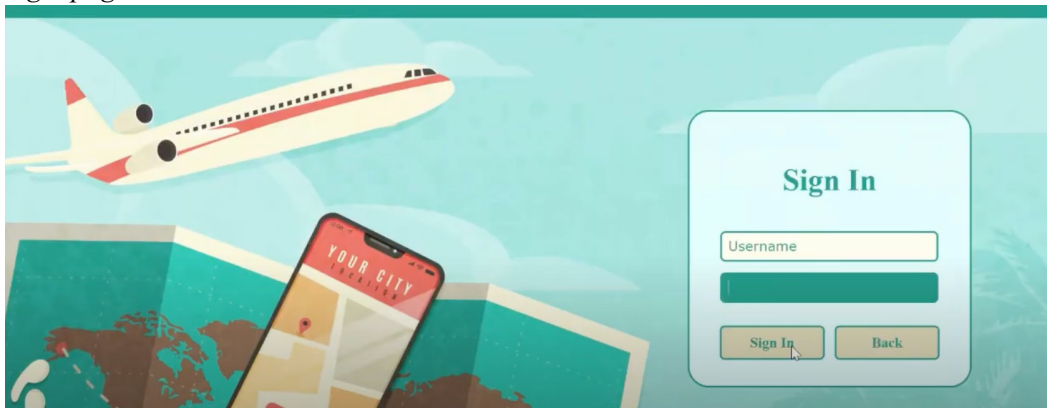

First Name Last Name

Phone Number

Username

Password

Login page,

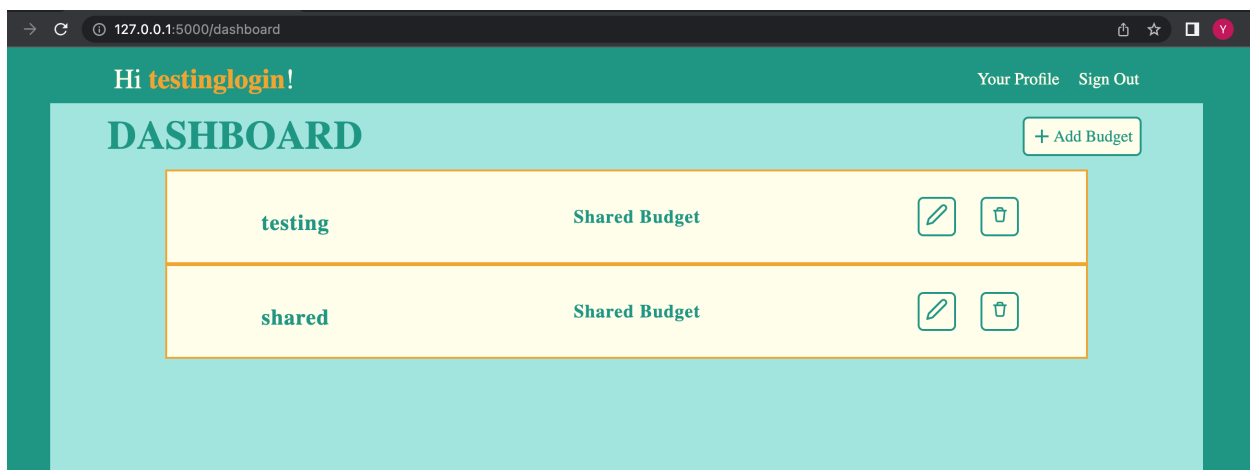

The sign in form is titled "Sign In" and shares the same background illustration as the registration page. It features input fields for "Username" and a password field. Below the fields are "Sign In" and "Back" buttons.

Sign In

Username

Dashboard page,

The dashboard page is shown within a browser window at the address "127.0.0.1:5000/dashboard". The page has a teal header with the text "Hi testinglogin!" and links for "Your Profile" and "Sign Out". The main content area is titled "DASHBOARD" and includes a "+ Add Budget" button. A table lists two budget items: "testing" and "shared", both with a "Shared Budget" status and edit/delete icons.

Challenges, changes in the plan and scope of the project and things that went wrong during this increment

Evaluating requirements and optimizing the design accordingly.

Adding multiple users to the same budgets.

Respecting FK & PK in stored procedures.

4) Team Member Contribution for this increment

a) Progress Report:

a. Group effort

b) Database:

a. Stored procedures: YT

c) Front End:

a. Front end done by EK & AF (pair programming)

d) Back End:

a. All backend code is done by NP, AJ, YT (pair programming)

e) Video presentation:

a. Demo: YT
